

Liquid HA 12

Product Sheet

*Liquid Humic Acid—12%**

All Natural Soil Conditioner

Liquid HA 12 is a concentrated source of humic acids containing 12% humic acid (by weight). This humic acid is extracted from high-quality oxidized lignite. It adds organic material in the form of liquid humic acids to soil to enhance nutrient uptake and stimulate soil life.

Liquid HA 12 is an ideal addition to your input program, especially when used in combination with soil-applied humates! Contact us for pricing and shipping costs.

Application Rates:

- Apply 1–3 gal/ac as a foliar application, 2–3 times per growing season recommended for row crops and forages.
- First application: Apply 1–3 gal/ac in furrow, or at planting as part of a starter program. Can also be used as a foliar treatment just past the seedling stage—about 25% coverage of the ground.
- Second application: Apply just before flowering, or just before the onset of the reproductive stage of the crop.
- Third application: Apply early in the grain-fill or fruit/vegetable-sizing stage.

Available Packaging:

JUGS/PAILS

Liquid HA 12% is available in cases of 4 x 1 gallon jugs, 2 x 2.5 gallon jugs, or 5 gallon pails.

TOTES

Liquid HA 12% is available in 275-gallon or 330-gallon totes.

BULK

Liquid HA 12% is available in bulk tankers (average 5,000 gal, minimum 2,000 gal).
